Notes from #82 - information gathered from survey
Nicholas Ceccarelli

Observations and comments:
- Date should be formatted in a manner that is easier for people to understand
  - Use 12-hour time rather than 24-hour
  - Include day of the week
- Make the title a different color than the rest of the text to accent it
- Make the location and date denoted differently to distinguish it from the description
- Add a divider between the events so we know where one event ends and the other begins
